# Acknowledgement of Country

The Australian Education Research Organisation (AERO) acknowledges the traditional custodians of the lands, waterways, skies, islands and sea country across Australia. We pay our deepest respects to First Nations cultures and Elders past and present. We endeavour to continually value and learn from First Nations knowledges and educational practices.

The Australian Education Research Organisation (AERO) is Australia's independent education evidence body, established and funded by Commonwealth, state and territory governments.

# AERO's vision

---

AERO's vision is for excellence and equity in educational outcomes for all children and young people through **effective use of evidence**.

**Generate**  
high-quality  
evidence

**Present** high-quality  
evidence that is  
**relevant** and  
**accessible**

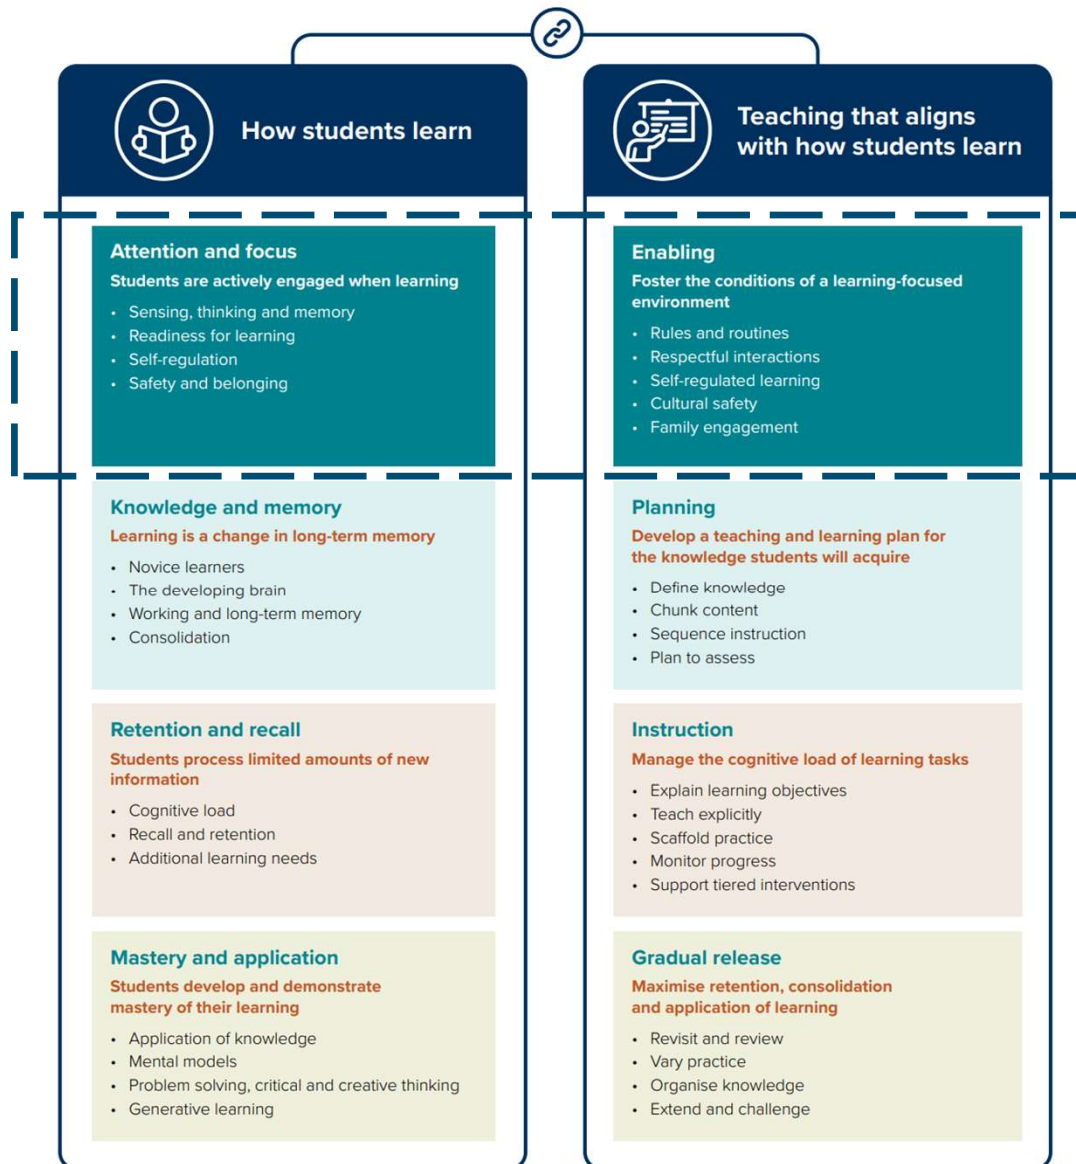

Encourage **adoption** and  
effective **implementation**  
of evidence in practice  
and policy

# A model of learning and teaching

Download the full model at  
[edresearch.edu.au/learning-teaching-model](https://edresearch.edu.au/learning-teaching-model)

## How students learn

### Attention and focus

Students are actively engaged when learning

- Sensing, thinking and memory
- Readiness for learning
- Self-regulation
- Safety and belonging

### Knowledge and memory

Learning is a change in long-term memory

- Novice learners
- The developing brain
- Working and long-term memory
- Consolidation

### Retention and recall

Students process limited amounts of new information

- Cognitive load
- Recall and retention
- Additional learning needs

### Mastery and application

Students develop and demonstrate mastery of their learning

- Application of knowledge
- Mental models
- Problem solving, critical and creative thinking
- Generative learning

## Teaching that aligns with how students learn

### Enabling

Foster the conditions of a learning-focused environment

- Rules and routines
- Respectful interactions
- Self-regulated learning
- Cultural safety
- Family engagement

### Planning

Develop a teaching and learning plan for the knowledge students will acquire

- Define knowledge
- Chunk content
- Sequence instruction
- Plan to assess

### Instruction

Manage the cognitive load of learning tasks

- Explain learning objectives
- Teach explicitly
- Scaffold practice
- Monitor progress
- Support tiered interventions

### Gradual release

Maximise retention, consolidation and application of learning

- Revisit and review
- Vary practice
- Organise knowledge
- Extend and challenge

**Enabling phase**  
AERO's classroom management guidance

### Classroom management resources

## User guide

December 2023

Australian teachers and leaders want to make the biggest possible difference to students' learning outcomes and see all students flourish and succeed. They care about students' safety and learning, which means they care about their behaviour. They know that engaging students through evidence-based, inclusive and culturally responsive practices is key, and that classroom management is a critical component of helping students thrive in their learning environments. Put simply, they want to know what works and how to put this into practice in their schools and classrooms.

The Australian Education Research Organisation (AERO) has developed a suite of foundational resources for beginning teachers, teachers working in new environments, or experienced teachers who want to refine or refresh specific elements of their classroom management practice. They can be used to individually reflect on and refine one's own practice, or as shared resources to support mentoring and other collaborative and whole-school approaches to improving classroom management.

This user guide explains the resources and provides suggestions for their use.

### Classroom management resources

There are 3 types of foundational resources.

**Classroom management explainers** summarise the evidence for classroom management. They explain key principles and describe how they are enacted in practice. These explainers cover:

- [positive teacher-student relationships](#)
- [high expectations for student behaviour](#)
- [teaching routines](#)
- [establishing and maintaining rules.](#)

edresearch.edu.au

Plain language summary

Australian Education Research Organisation

### Classroom management explainer

## Teaching routines

December 2023

Effective classroom management is essential for all students. This explainer describes the most rigorous classroom management from across Australia and internationally. The Australian Education Research Organisation (AERO) has developed a suite of foundational resources for beginning teachers, teachers working in new environments, or experienced teachers who want to refine or refresh specific elements of their classroom management practice. They can be used to individually reflect on and refine one's own practice, or as shared resources to support mentoring and other collaborative and whole-school approaches to improving classroom management.

This explainer focuses on teaching routines, predictability and consistent teacher-student relationships. High expectations for student behaviour are a key principle of effective classroom management. Routines are sequences of recurring and taught by the teacher and practice productive and automatic, execution working memory to focus on learning.

**To explicitly teach a routine:**

1. Introduce the routine and brief students on its purpose.
2. Model and describe the routine.
3. Provide an opportunity for students to practice the routine until everyone is getting it and supporting others.

### Classroom management skill

## Building positive relationships with all students

December 2023

Effective classroom management creates safe and supportive learning environments for all students. This practice resource is part of a suite of foundational resources for beginning teachers, teachers working in new environments, or experienced teachers who want to refine or refresh specific elements of their classroom management practice. They can be used to individually reflect on and refine one's own practice, or as shared resources to support mentoring and other collaborative and whole-school approaches to improving classroom management.

The Australian Education Research Organisation (AERO)'s guidance is based on a **synthesis** of the most rigorous and relevant research evidence and guidance on classroom management from a wide range of research experts and expert practitioners across Australia and internationally.

Scanning is a skill that supports and maintains positive student behaviour. Related practice resources to refine other skills focus on [acknowledgement and praise](#), [circulate](#), [clear communication](#), [deliberately pause](#), [nonverbal correction and voice control](#).

Scanning is the practice of consistently and intentionally monitoring all students. It allows you to gather information efficiently and regularly about students' behaviour and participation in learning.

### The importance of scanning

Scanning is a proactive skill that can promote safety, increase student demonstration of expected behaviours, and prevent disengaged and disruptive behaviours. Effective scanning allows you to identify and [acknowledge](#) students meeting behaviour expectations, [praise](#) students exceeding behaviour expectations specific to them and [respond to disengaged and disruptive behaviours](#). It can help you decide when it is time to revisit and reteach various aspects of your classroom culture.

# Evidence explainers

## Positive relationships

Plain language summary

### Classroom management explainer Positive teacher–student relationships

December 2023

Effective classroom management creates safe and supportive learning environments for all students. This explainer is part of a suite of foundational resources for beginning teachers, teachers working in new environments, or experienced teachers who want to refine or refresh specific elements of their classroom management practice. They can be used to individually reflect on and refine one's own practice, or as shared resources to support mentoring and other collaborative and whole-school approaches to improving classroom management.

The Australian Education Research Organisation (AERO)'s guidance is based on a [synthesis](#) of the most rigorous and relevant research evidence and guidance on classroom management from a wide range of research experts and expert practitioners across Australia and internationally.

This explainer describes how creating connections with students over time can help develop trust and positive relationships to support learning. Related explainers focus on [high expectations for student behaviour](#), [teaching routines](#) and [establishing and maintaining rules](#).

Positive teacher–student relationships are supportive and fair, and develop in learning environments where students feel safe, understood and appreciated. Teachers build connections with students when they demonstrate respect and trust, and have empathy for their needs (McDonald, 2019). Trust grows over time through multiple positive verbal and non-verbal interactions (Bennett, 2020; McDonald, 2019), however, building trust with some students is not easy (McDonald, 2019). In these circumstances, teachers can invest more time to build connections and show they are trustworthy. Trust and positive teacher–student relationships are built on the structure, predictability, reliability and dependability provided by routines and consistency (Bennett, 2020). Teachers affirm the belief that all students can experience learning success by maintaining high expectations, modelling expected behaviours and responding to students' needs. This approach to building and sustaining high expectations fosters belonging, positive relationships and effective teaching and learning (AERO, 2023; Cobb & Krownapple, 2019; Healey & Stroman, 2021; Miller & Steele, 2021).

## High expectations

Plain language summary

### Classroom management explainer High expectations for student behaviour

December 2023

Effective classroom management creates safe and supportive learning environments for all students. This explainer is part of a suite of foundational resources for beginning teachers, teachers working in new environments, or experienced teachers who want to refine or refresh specific elements of their classroom management practice. They can be used to individually reflect on and refine one's own practice, or as shared resources to support mentoring and other collaborative and whole-school approaches to improving classroom management.

The Australian Education Research Organisation (AERO)'s guidance is based on a [synthesis](#) of the most rigorous and relevant research evidence and guidance on classroom management from a wide range of research experts and expert practitioners across Australia and internationally.

This explainer focuses on high expectations for student behaviour, describing how maintaining high expectations for all students can positively impact their behaviour and readiness to learn. Related explainers focus on [positive teacher–student relationships](#), [teaching routines](#) and [establishing and maintaining rules](#).

High expectations for behaviour are standards of conduct that promote positive student behaviour, expressed in daily [routines](#), [rules](#) and behaviours in the classroom. Examples include: expecting that students be on time, line up quietly outside before [entering the classroom](#) ([raise their hands when they have a question](#)), quietly put away equipment and follow the teacher's instructions when transitioning between activities. High expectations for behaviour should be consistently demonstrated by all teachers in all classrooms as part of a whole-school approach.

High expectations for student behaviour are best supported by [positive teacher–student relationships](#) built on understanding and mutual respect (Stronger Smarter, 2017). These relationships help teachers enact and have high expectations for students, rather than of them, supporting students to meet the high expectations (Stronger Smarter, 2019). Students will need varying levels of support to meet high expectations, and some may require different point-in-time expectations as they develop their skills.

aeroresearch.edu.au

1 of 4

## Routines

Plain language summary

### Classroom management explainer Teaching routines

December 2023

Effective classroom management creates safe and supportive learning environments for all students. This explainer is part of a suite of foundational resources for beginning teachers, teachers working in new environments, or experienced teachers who want to refine or refresh specific elements of their classroom management practice. They can be used to individually reflect on and refine one's own practice, or as shared resources to support mentoring and other collaborative and whole-school approaches to improving classroom management.

The Australian Education Research Organisation (AERO)'s guidance is based on a [synthesis](#) of the most rigorous and relevant research evidence and guidance on classroom management from a wide range of research experts and expert practitioners across Australia and internationally.

This explainer focuses on teaching routines, describing how explicit teaching of routines provides structure, predictability and consistency to support student learning. Related explainers focus on [positive teacher–student relationships](#), [high expectations for behaviour](#) and [establishing and maintaining rules](#).

Routines are sequences of recurring tasks or actions, for example, [entering the classroom](#), designed and taught by the teacher and practised by students to become automatic (Lemov, 2015). Their efficient, productive and automatic execution reduces wasted learning time and helps to 'free up students' working memory to focus on learning.

#### To explicitly teach a routine:

1. Introduce the routine and briefly detail your expectations (why and what).
2. Model and describe the routine to your students by demonstrating the expected behaviours (I do).
3. Provide an opportunity for students to practise the routine with teacher support (we do).  
Practise the routine until everyone can do it the best they can, acknowledging students who are getting it and supporting those who are not.

aeroresearch.edu.au

## Rules

Plain language summary

### Classroom management explainer Establishing and maintaining rules

December 2023

Effective classroom management creates safe and supportive learning environments for all students. This explainer is part of a suite of foundational resources for beginning teachers, teachers working in new environments, or experienced teachers who want to refine or refresh specific elements of their classroom management practice. They can be used to individually reflect on and refine one's own practice, or as shared resources to support mentoring and other collaborative and whole-school approaches to improving classroom management.

The Australian Education Research Organisation (AERO)'s guidance is based on a [synthesis](#) of the most rigorous and relevant research evidence and guidance on classroom management from a wide range of research experts and expert practitioners across Australia and internationally.

This explainer focuses on establishing and maintaining classroom rules, describing how rules allow teachers to clearly state the behaviour expectations for all students in the learning environment. Related explainers focus on [positive teacher–student relationships](#), [high expectations for student behaviour](#) and [teaching routines](#).

A rule is usually a short instruction for conduct or action that everyone is expected to know, follow and refer to regularly (Bennett, 2020). A list of rules should be as simple and as short as possible (Archer & Hughes, 2011; Bennett, 2020) to avoid students' working memory becoming overloaded, help them to remember what is expected, and limit distraction from their learning (Alter & Haydon, 2017).

## Explicitly teaching an expectation, routine or rule

---

1. Introduce the expectation, routine or rule, including why it's important.
2. Model, explain and discuss it.
3. Support students to practise it.
4. Ask students to demonstrate it independently. Provide feedback. Practise again.
5. Remind, monitor, acknowledge and praise.
6. Respond to students if they don't demonstrate it, practising again when needed.

**Classroom management**

“

The actions teachers take to create an environment that supports and facilitates both academic and social-emotional learning.

”

Evertson & Weinstein (2006)

- safe
- respected

## Classroom management

“

The actions teachers take to create an environment that supports and facilitates both academic and social-emotional learning.

Evertson & Weinstein (2006)

”

**Preparation**

- Consider how staff at your school will respond to this definition. Might they need a short discussion around it?

**Facilitator notes**

*Give staff time to read the definition provided.*

This session is a good opportunity to reflect on the *actions* you take to create a safe and inclusive environment that supports learning. Classroom management is all about teacher actions in teacher-led classrooms. They are intentional and *planned*. Importantly, they include the actions we take to build relationships with our students and create an environment that is safe and orderly, and supports student academic and social-emotional learning.

*Optionally, allow participants time to discuss how the definition sits with their understanding of classroom management.*

In our discussions today, please remember that we come to this with varying levels of experience, so we'll all support each other as we collaboratively strengthen our shared understanding of evidence-based classroom management.

## High expectations, routines and rules

---

### Facilitator notes

Explicitly teaching (rather than just telling) then revising and reinforcing the high expectations, routines and rules builds shared understanding and practice in the classroom and across the school by teaching students what to do, what not to do and how to demonstrate the expected behaviours.

Once taught, high expectations, routines and rules can be referenced to support students' safety and learning – for example, if a student isn't completing a learning task because they say it's too hard, instead of demanding its completion and outlining the consequences for non-compliance, we can share our expectations that they will complete the learning task because we believe they have the ability to do so. We allow them to discuss any concerns or difficulties, and provide the support needed so the student can complete it successfully.

## Reflection

---

- What high expectations for my students do I consistently maintain?
- How do I maintain high expectations while maintaining relationships?
- What high expectations could I more consistently maintain?
- What support do I need to do that?

### Preparation

- You may want to gather anonymous responses to this reflection – for example, on post-it notes or a Padlet wall ([www.padlet.com](http://www.padlet.com)). Anonymity can encourage frank responses. This data could be used to determine a focus for refinement across the school.

### Facilitator notes

*Give participants time to individually reflect on these questions. Allow 5 minutes for this reflection.*

Positive relationships with students and families

## Our values

**Value**  
[Add one of your school's values and its meaning or related goal.]

**Value**  
[Add one of your school's values and its meaning or related goal.]

**Value**  
[Add one of your school's values and its meaning or related goal.]

**Value**  
[Add one of your school's values and its meaning or related goal.]

**Value**  
[Add one of your school's values and its meaning or related goal.]

What behaviours do you expect to see when our values are demonstrated by:

- staff
- students
- parents and carers?

**Preparation**

- Please add your school's values and the definitions or goals related to them to the slide.
- If your school requires classrooms to have the values displayed, you might like to add a new slide following this slide with images showing these displays.
- Consider how your values link to your approach to classroom management and are demonstrated in positive relationships, high expectations, routines and rules.

**Facilitator notes**

*Explain your school's values, what they mean and your school's goals relating to the values, if relevant.*

## Positive relationships with students and families

---

### What we do every day (or is ongoing)

- We speak in a calm tone and are always polite and respectful.
- Acknowledge students meeting behaviour expectations and praise students exceeding behaviour expectations specific to them.
- Use positive non-verbal communication.
- During break times, engage in conversation with students about their hobbies and interests.
- Exit classrooms at the end of the day with students to farewell them and interact with other students and families.

### Preparation

- Please edit the slide to reflect your context.
- You may want to read Chapter 5 of AERO's Foundational Classroom Management Resources Handbook.

### Facilitator notes

Investing time and effort into connecting positively and getting to know students and their families will help you build relationships.

Here are some examples of what we do to achieve this.

# Classroom management practice guides and skill resources

## Support for refining your practice

### Rehearse and practise your entrance routine

#### 1. Position yourself to see all students

Rehearse then practise standing where you will be able to see all students preparing to assemble and assembling (likely just outside the entrance of your classroom). Does your position:

- ensure you don't have blind spots that need to be regularly monitored?
- allow you to scan and see all students preparing to enter the room?
- allow all students to see you ready to gain their attention?

How might you need to adjust your position for certain classrooms or classes?

#### 2. Gain all students' attention

Rehearse then practise:

- gaining all students' attention by using your countdown, call and response, or visual cue or gesture
- deliberately pausing
- scanning all students

**Routines are sequences of recurring tasks or actions that are taught and practised to become automatic.**

---

## **Reflection**

- What repeatedly happens in our classrooms daily or weekly that should be taught and practised as routines?
- What difference does it make (or would it make) to have these procedures become consistent and automatic? What makes me say that?

# Routines

## Teaching and learning

Daily, weekly and monthly review

Starter activity

Random selection for student response

Self-review

## Whole school

Entering the school grounds

Moving through the school

Leaving mobile phones in bags or at the office

Entering and leaving various locations

Eating time

Break time

School assembly

Leaving the school grounds

## Reflection

Consider your own or others' interactions with students.

What do you do well?

What could you refine?

Who do you interact with well?

To whom could you give more attention?

Classroom management practice guide

## Building positive connections with all students

December 2023

Effective classroom management creates safe and supportive learning environments for all students. This practice guide is part of a suite of foundational resources for beginning teachers, teachers working in new environments, or experienced teachers who want to refine or refresh specific elements of their classroom management practice. They can be used to individually reflect on and refine one's own practice, or as shared resources to support mentoring and other collaborative and whole-school approaches to improving classroom management.

The Australian Education Research Organisation (AERO)'s guidance is based on a [synthesis](#) of the most rigorous and relevant research evidence and guidance on classroom management from a wide range of research experts and expert practitioners across Australia and internationally.

---

Scanning is a skill that supports and maintains positive student behaviour. Related practice resources to refine other skills focus on [acknowledgement and praise](#), [circulation](#), [clear communication](#), [deliberately pausing](#), [non-verbal correction](#) and [voice control](#).

Scanning is the practice of consistently and intentionally monitoring all students. It allows you to gather information efficiently and regularly about students' behaviour and participation in learning.

#### The importance of scanning

Scanning is a proactive skill that can promote safety, increase student demonstration of expected behaviours, and prevent disengaged and disruptive behaviours. Effective scanning allows you to identify and [acknowledge](#) students meeting behaviour expectations, [praise](#) students exceeding behaviour expectations specific to them and [respond to disengaged and disruptive behaviours](#). It can help you decide when it is time to revisit and reteach various aspects of your classroom culture.
